

ASTRAMICRO.

May 02, 2017

Astramicro is currently trading at 127 levels. The stock is poised for initial run up till 170-180 levels (Upside 25%). However, the stock can have extended moves till 200. Below is technical stand for the same.

- Mention chart poised for descending triangle breakout on weekly charts, the mention chart pattern ac as a continuation pattern.
- With supportive indicator RSI on the weekly charts has posted a trend line breakout, which will eventually push RSI on the higher side adding strength to the underlying trend.
- The stock completed the correction at 50.00% of the previous bull move, which adds to our conviction that the continuation pattern will unfold into higher moves.
- We suggest to accumulate the stock at current levels or on dips till 124 - 122 zone for initial run up till 170-200.
